Evaluation and diagnostics

Jae Edmonds
Shinichiro Fujimori
Elmar Kriegler

Summary of this year's SWG

- This year's contributions
  - Exploring the possibility space: taking stock of the diverse capabilities and gaps in integrated assessment models (Ilkka Keppo)
  - GCAM exercise on model evaluation in income distribution (Kanishka Narayan)
  - A national scenario framework proposal (Shinichiro Fujimori)

- Discussions
  - Make the models open source would be one of the ways to better respond to critiques but it may not be sufficient
  - Modular based model development and making them test independent would be also meaningful
